

Good News for all International Students in Taiwan 😊

MIT faculty based organization consisting of students from Massachusetts Institute of Technology; Harvard University with joint collaboration of College of medical science & Technology, Taipei Medical University opens the course “**Global Health Informatics to Improve Quality of Care**”. This course would provide knowledge and skills needed to provide care for health care clients and assist workers for health care procedures at resource poor settings where the resources are sacred.

As Mobile telemedicine platform is seamlessly connects health workers to medical professionals for resource-poor settings around the world.

We are offering this course to International students from all backgrounds by providing opportunity to work in a Team to utilize their skills from different backgrounds and **opportunity to work with MIT research fellows**.

We will award **Certificates** to successful candidates signed from both TMU and MIT faculty.

The project task will be provided at TMU that is predominately 80% hands-on and provides you with the skills and knowledge required by the modern technologies.

If the students other than TMU, they do not necessarily need to enroll at TMU to be able to undertake this course.

All of the meetings and practical demonstrations would be held at the College of Medical Science & Technology, TMU. So, apply as soon as possible because of the availability of limited seats.
